

CS 4363/CS 6373 SPRING 2025

EXAMINATION SUBMISSION GUIDELINES AND POLICIES

- DUE DATE
 - Due date will be announced with the examination questions.
 - Solutions will be published soon after the due date.
- LATE SUBMISSION POLICY
 - Written submissions cannot be accepted after the solution has been posted.
 - In exceptional circumstances I may briefly delay release of the solution.
- SUBMISSION PREPARATION
 - Use the provided submission template.
 - Do not discuss exam questions with others. This is NOT a group activity. Formulate and write responses on your own.
 - You can refer to any material but are not allowed to discuss specific questions with anyone, including but not limited to your classmates.
 - Use of ChatGPT and similar AI tools as search engines is acceptable, but verbatim output of these may not be used in writing your answers.
 - Excessive searching for material on the internet is not recommended.
 - Focus on the lecture and the textbook.
 - Irrelevant responses will be penalized.
 - Don't make assumptions on specific questions, unless otherwise you're asked to do so.
 - Poor presentations (like language, grammar, handwriting errors) will be penalized.
 - Do not wait till the last minute to prepare your response.
- GRADING GUIDELINES
 - Each question is marked as [O] or [S] denoting Objective or Subjective respectively. [O] questions have a well-defined correct answer and will be graded accordingly. An explanation of the answer is required. Keep your answer to the point. [S] questions can have several "correct" answers and will be graded accordingly. Formulate your response with the following mindset: Suppose you are the security expert in your organization and your boss poses this question to you for your expert opinion. How would you respond?
 - Answers are anticipated to be a short paragraph. Say 5-6 lines at most. However, no minimum or maximum size is specified. Use your judgement. Stay on topic and address the question.

EXAMINATION SUBMISSION TEMPLATE

The examination solution submission should specify your name, followed by the Honor Code statement and the responses to the examination questions, as shown below.

Name: <enter your name here>

Honor Code Statement:

As per the UTSA honor code I attest that I have not taken any help from anyone, including but not limited to my classmates, in formulating and writing this weekly quiz solution report. Further, I have not given any help to anyone else in formulating and writing their weekly quiz solution report for this week. I understand that consultation of ChatGPT and similar AI programs as search engines is permitted, but verbatim output of these tools may not be used in writing my answers.

By submitting this solution, I acknowledge that I am personally testifying to the veracity of this honor code statement.

Examination Solution:

Give your answers to examination questions identified by question number and ordered in sequence. For objective type questions explain how you arrived at the answer. For other questions present your answer in a few sentences. Points will be deducted for unprofessional presentation.
